

NETASQ IS THE ACESUR GROUP'S CHOICE FOR ENHANCING SECURITY AND CONTROL OVER ITS INTER-OFFICE NETWORK

For over 150 years, the ACESUR Group has been a leader within the national olive oil sector in Spain, exporting its products to more than 70 countries around the world.

So when a project was launched to interconnect offices and set up a new central ERP system for the group's collaborators, nothing but flawless security could be accepted. The chosen NETASQ network security solutions offer perfect synergy between hardware and software, providing a powerful, yet simple response to the group's needs.

THE CHALLENGES

- Replacing slow and obsolete existing solutions.
- Increasing the group's protection and control while optimizing network performance.
- Securely interconnecting all of the group's subsidiaries and providing centralized access to all services.
- Allowing mobile users and certain providers to remotely access the network without compromising on speed.
- Providing a secure foundation for the new ERP system.

THE SOLUTION

NETASQ U70 appliances were progressively introduced over a 2 month period, with the collaboration of **CONTROLSYS**, a Silver-certified NETASQ partner.

The leading objective of this project was the sharing of information and services across 500 employees located in 8 remote subsidiaries.

The chosen solution not only had to securely connect the subsidiaries to one another, but also to enable secure remote access to mobile users with full traffic monitoring and performance optimization.

“*NETASQ APPLIANCES ARE ALL-INCLUSIVE AND HAVE CONTRIBUTED TO PROVIDING US WITH VERY STABLE COMMUNICATIONS WHILE REDUCING UNNECESSARY TRAFFIC.*”

Adolfo Caravantes

The intrusion detection system, VPN, content filtering and high availability are just some of the benefits that have guided the Acesur group's choice in NETASQ's favor.

ADVANTAGES AND PERSPECTIVES

- **Ease of installation:** NETASQ solutions can be easily and progressively integrated into any type of network infrastructure, even the most sensitive and at any level.
- **Effectiveness:** Secures all of the group's communications, with powerful traffic monitoring, thanks in particular to the unique embedded intrusion prevention engine.
- **Flexibility:** The all-in-one NETASQ U70 solution comprises all the functionality mandated by the ACESUR group.
- **Stability and speed:** The interconnection of sites, the access to centralized services and the successful deployment of the new ERP system were completed without compromising the performance or stability of the network, or indeed any adverse impact on remote sites or mobile users.
